# Be Found in AI Hotel Searches

Search is changing fast. We offer an AI-focused search optimization package to help your property appear more prominently in AI-driven search tools — including ChatGPT-style results — along with improved local and organic SEO performance.

Travelers are now asking:

"Best hotels near…"     "Is this hotel walkable?"     "Good wedding venue on the Maine coast?"

**Our job is to make sure your hotel is the answer — in Google, Maps, and AI tools like ChatGPT.**

## AI doesn't "browse" like a human

If your hotel's website and listings aren't clear, consistent, and structured properly, AI may never recommend your property — even if it's a perfect match.

**AI pulls information from:**

Your website content
Google Business Profile
FAQs and structured data
Reviews and listing consistency

**If your information is:**

Outdated
Vague
Inconsistent across platforms

=**You get skipped.**
**This service fixes that.**

## Premium Package Includes

### Technical SEO
Core Web Vitals, crawl optimization, indexing, mobile performance

### On-Page SEO
Keyword recovery, meta optimization, internal linking, content refresh

### AI Search Optimization (AEO)
AI-friendly rewrites, structured content for ChatGPT & Gemini visibility

### Local SEO & Google Business
